INDEX OF VOLUME I

Birkhoff, G. and Burton, L. *Note on Newtonian force-fields*, 199
Bruck, R. H. and Ryser, H. J. *The nonexistence of certain finite projective planes*, 88
Burton, L. *See* Birkhoff and Burton
Busemann, H. *Angular measure and integral curvature*, 279

Chowla, S. D. and Todd, J. *The density of reducible integers*, 297

Davenport, H. and Pólya, G. *On the product of two power series*, 1
Duff, G. F. D. *Factorization ladders and eigenfunctions*, 379

Einstein, A. and Infeld, L. *On the motion of particles in general relativity theory*, 209
Ellis, H. W. *Mean-continuous integrals*, 113

Fenchel, W. *On conjugate convex functions*, 73
Frame, J. S. *Congruence relations between the traces of matrix powers*, 303
Frucht, R. *Graphs of degree three with a given abstract group*, 365

Hall, M. *Subgroups of finite index in free groups*, 187

Infeld, L. *See* Einstein and Infeld

Kaplansky, I. *Groups with representations of bounded degree*, 105

Lalan, V. *Sur les surfaces à courbure moyenne isotherme*, 6
Lorentz, G. G. *Direct theorems on methods of summability*, 305

MacDuffee, C. C. *Orthogonal matrices in four-space*, 69
Mahler, K. *On the critical lattices of arbitrary point sets*, 78
———— *On a theorem of Liouville in fields of positive characteristic*, 397
Mendelsohn, N. S. *Applications of combinatorial formulae to generalizations of Wilson's Theorem*, 328
Menger, K. *Generalized vector spaces. I. The structure of finite-dimensional spaces*, 94
Minakshisundaram, S. *A generalization of Epstein zeta functions* (With supplementary note by H. Weyl), 320
———— and Pleijel, Å. *Some properties of the eigenfunctions of the Laplace operator on Riemannian manifolds*, 242
Morse, M. and Transue, W. *Functionals of bounded Fréchet variation*, 153

Pall, G. *Representation by quadratic forms*, 344
Pleijel, Å. *See* Minakshisundaram and Pleijel
Pólya, G. *See* Davenport and Pólya

Rado, R. *Axiomatic treatment of rank in infinite sets*, 337
Robinson, G. de B. *On the disjoint product of irreducible representations of the symmetric group*, 166
Ryser, H. J. *See* Bruck and Ryser

Schild, A. *Discrete space-time and integral Lorentz transformations*, 29
Snapper, E. *Completely indecomposable modules*, 125
Stone, M. H. *Boundedness properties in function-lattices*, 176
Synge, J. L. *On the motion of three vortices*, 257

Taussky, O. *On a theorem of Latimer and MacDuffee*, 300
Titchmarsh, E. C. *On the uniqueness of the Green's function associated with a second-order differential equation*, 191
Todd, J. *See* Chowla and Todd
Transue, W. *See* Morse and Transue
Turnbull, H. W. *Note upon the generalized Cayleyan operator*, 48

Weinstein, A. *On surface waves*, 271
Weyl, H. *Elementary algebraic treatment of the quantum mechanical symmetry problem*, 57
————*Supplementary note to a paper by Minakshisundaram*, 326
